Human Resources Department, CMB Wing Lung Bank Limited

Dear Hiring Team,

I am writing to apply for the IT Graduate Trainee position, Application Development section. I am completing an MSc in Data Science at The University of Hong Kong (graduating March 2027) and hold a BEng in Data Science and Big Data Technology from Nanjing University of Science and Technology. I am eligible to work in Hong Kong under IANG and do not require sponsorship, and I can start on 1 February 2027.

Since April 2026 I have been an AI Research Intern at Amber Group in Hong Kong, building a multi-agent control layer that coordinates more than 40 agents and serves over 200 internal users, together with the evaluation tools that keep it dependable. Earlier, I developed LLM-based applications at NOVOAI, including verification steps for an insurance assistant, and built data pipelines at Himalaya. I work mainly in Python and SQL and am comfortable taking a feature from requirements through testing to release.

I would like to bring this experience to a bank's in-house development team, where software, data and reliability matter equally. CMB Wing Lung's growth as part of China Merchants Bank, and its investment in digital banking and data solutions, make it a place where I can learn banking systems properly while contributing from day one. I am fluent in English and native in Mandarin.

Thank you for your time and consideration. I would welcome the opportunity to discuss how I can contribute to CMB Wing Lung Bank.

Sincerely,
Xiang Gu
