26 October 2026

Recruitment Team, The Hongkong Electric Co., Ltd.

Dear Recruitment Team,

I am writing to apply for the Graduate Trainee 2027 programme (GT-2027-COW) in the Information Technology discipline. I am completing an MSc in Data Science at The University of Hong Kong (graduating March 2027) and hold a BEng in Data Science and Big Data Technology from Nanjing University of Science and Technology. I am eligible to work in Hong Kong under IANG and do not require sponsorship.

Since April 2026 I have been an AI Research Intern at Amber Group in Hong Kong, where I build a multi-agent control layer that coordinates more than 40 agents and is used by over 200 internal staff, including the evaluation tooling that keeps it reliable. Before that, I built LLM applications with verification steps at NOVOAI and data pipelines at Himalaya. I work mainly in Python and SQL, and I care about systems that colleagues can depend on every day.

HK Electric's commitment to reliable supply and its ongoing digital transformation, from smart-grid data to customer-facing systems, is where I would like to apply these skills. A structured graduate programme in a utility that serves Hong Kong Island and Lamma would let me learn how critical infrastructure is run while contributing data, automation and software skills from the start.

Thank you for your time and consideration. I would welcome the opportunity to discuss how I can contribute to HK Electric.

Sincerely,
Xiang Gu
