Hiring Team, Metabit Technology

Dear Hiring Team,

I am writing to apply for the Software Engineer, 2027 New Grad role. I am completing an MSc in Data Science at The University of Hong Kong (graduating March 2027) and hold a BEng in Data Science and Big Data Technology from Nanjing University of Science and Technology. I am eligible to work in Hong Kong under IANG and do not require sponsorship.

Since April 2026 I have been an AI Research Intern at Amber Group in Hong Kong, building LLM agent systems in Python for a digital-asset financial firm. Before that I was an LLM full-stack intern at NOVOAI and developed AI data pipelines at Himalaya, so I have shipped software end to end, from data processing to services and interfaces.

Alongside engineering, I bring research rigor: first-author papers at AAAI 2026 and ECAI 2024, plus work published at ICCV 2025 and IEEE T-IFS. I also have hands-on experience with blockchain and EVM tooling. Metabit's technology-driven quantitative trading, especially in digital assets, matches both my engineering skills and my interest in markets, and I am eager to build fast, reliable systems with your team.

Thank you for your time and consideration. I would welcome the chance to discuss how I can contribute.

Sincerely,
Xiang Gu
