Job Specific Questions | Edit

Questionnaire

Please select the highest qualification you are currently pursuing and/or have completed?	Postgraduate level (or equivalent)
Please list the graduation year of the highest degree you are currently pursuing and/or have completed. If you are planning on pursuing higher education that is not listed on your resume/application, please list that expected graduation year instead.	2027
How many years of full-time, post-qualification experience do you have relevant to this role? If you are still working towards your degree/qualification, please select 'Less than 1 year'.	Less than 1 year
Please tell us what interests you about working in the built environment and why you specifically want to work at Arup? - need Please be specific about what appeals to you—whether it's our values, the opportunities we offer, or something else that resonates with you. We'd like to understand your motivation for and knowledge of our organisation.	At Amber Group I build the AI layer a whole organisation works through: a multi-agent control layer across Web and Lark that coordinates 40+ agents for 200+ colleagues, plus the evaluation framework that tells us where agents fail and why. The hardest part is not the model; it is turning messy business processes into systems people trust and use every day. The built environment has that same challenge at far greater scale, where better decisions on infrastructure, energy and climate affect millions of people. Arup combines technical rigour with real client impact, and its digital and advisory work is exactly where I want to apply my HKU Data Science training and agent-system experience: scoping AI problems with clients, building evaluated solutions, and

	growing into a consultant who delivers measurable outcomes.
Please indicate the academic results of your most relevant degree as an overall percentage.	80 - 89%
Is your course recognised or accredited by a professional or industry body? (If applicable – some courses may not require accreditation. Please select the appropriate option)	No
While the role you applied for is in the discipline specified in the job advert, we may have other opportunities that align with your profile. To help us assess this, please let us know what are your top other 3 areas of interest here.	Digital Services
Please list the graduation month of the highest degree you are currently pursuing and/or have completed. If you are planning on pursuing higher education that is not listed on your resume/application, please list that expected graduation month instead.	Mar
Please share a project you are proud to have worked on and your role in delivering this. We would like to know how this is relevant to the role you are applying for and what you learned from this experience. We encourage you to share projects related to any relevant modules, technical skills, strengths, or experiences that you believe would enable you to excel in the role you are applying for.	At Amber Group (AI Research Intern, Apr 2026 to present) I built a multi-agent long-task control layer across Web and Lark that runs swarm inference over 40 different agents and now serves 200+ people across the company. I connected internal tools including Dify, n8n, OpenClaw and Weknora so non-technical teams could automate real work, and I set up enterprise-agent evaluation, from task decomposition to failure analysis, so we could measure reliability rather than guess. I am proud of it because it changed how a company works day to day, and it taught me what consulting needs: understand the user, design the system, prove that it works.
As part of your application, you are required to upload a copy of your academic transcript. Please confirm whether you have uploaded this document to your application.	Yes
While the role you applied for is based in the location specified in the job advert, we may have other opportunities that align with your profile. To help us assess this, please let us know which Arup office locations you would be interested in, here.	Shenzhen
Please provide your current work rights status for the country of application (EA)	Hong Kong IANG visa holder
Which languages are you professionally fluent in? (Select all that apply)	English
