Advanced Digital Engineering Team, Arup Hong Kong

Dear Hiring Team,

I am writing to apply for the Graduate AI Consultant (2027 Intake) role in Arup's Advanced Digital Engineering team in Hong Kong. I am completing an MSc in Data Science at The University of Hong Kong (graduating March 2027) and hold a BEng in Data Science and Big Data Technology from Nanjing University of Science and Technology. I am eligible to work in Hong Kong under IANG and do not require sponsorship.

Since April 2026 I have been an AI Research Intern at Amber Group, designing a multi-agent control layer that coordinates more than 40 agents for over 200 internal users, including how agents are evaluated and kept reliable. At NOVOAI I built an LLM insurance agent with a verification step to catch errors before they reach users. I enjoy the consulting side of this work: understanding what a team needs, prototyping quickly and turning a proof of concept into something people trust.

My research background fits the engineering context of Arup's work. My first-author papers at AAAI 2026 and ECAI 2024 combine vision-language models with 3D point clouds, and I contributed to work at ICCV 2025, so applying AI to buildings, infrastructure and digital twins is a natural next step. I would be glad to help clients use AI in ways that support sustainable, resilient cities.

Thank you for your time and consideration. I would welcome the chance to discuss how I can contribute to your team.

Sincerely,
Xiang Gu
