Graduate Recruitment Team, MTR Corporation Limited

Dear Graduate Recruitment Team,

I am writing to apply for the 2027 MTR Graduate Development Programmes, with the Graduate Trainee Programme as my first preference. I am completing an MSc in Data Science at The University of Hong Kong (graduating March 2027) and hold a BEng in Data Science and Big Data Technology from Nanjing University of Science and Technology. I am eligible to work in Hong Kong under IANG and do not require sponsorship.

Since April 2026 I have been an AI Research Intern at Amber Group in Hong Kong, building a multi-agent platform now used by more than 200 internal staff. Earlier, I built LLM applications at NOVOAI and data pipelines at Himalaya, and I managed new-product-introduction work on Apple Watch at Luxshare, coordinating engineering, suppliers and schedules. These roles taught me to turn data and AI into tools that colleagues actually rely on.

MTR's push into digitalisation and innovation, from asset data analytics to smarter customer services, is exactly where I want to apply this experience. The GT rotations across operations, property and corporate functions would let me learn how a city-scale network is run while contributing analytical and technical skills from day one. I also have first-author research at AAAI 2026 and ECAI 2024, which has trained me to work rigorously and communicate clearly.

Thank you for your time and consideration. I would welcome the opportunity to discuss how I can contribute to MTR.

Sincerely,
Xiang Gu
