Relative(s) in MTR | Edit

Other Information | Edit

Career Aspiration and Key Achievements	I am currently pursuing an MSc in Data Science at the University of Hong Kong (expected graduation March 2027), building on a BEng in Data Science and Big Data Technology from Nanjing University of Science and Technology. My goal is to apply AI, data science, and full-stack LLM engineering to real problems in MTR Group's operations and services. At Amber Group (April 2026 to present), I design and develop a multi-agent LLM platform with 40+ agents serving 200+ internal users, owning agent orchestration, tool-use pipelines, and the evaluation workflow. At NOVOAI (October 2025 to April 2026), I worked as an LLM full-stack intern, delivering end-to-end features from model integration to the UI. Earlier internships at Himalaya Science and Technology and at Luxshare Precision (Apple Watch NPI), plus a Research Assistant role at NJUST, gave me experience across data pipelines, product delivery, and applied research. I am drawn to MTR's Graduate Trainee Programme because it combines real cross-functional exposure with the scale and complexity of a major operator, which matches where I want to focus my career. I am IANG eligible and available to work in Hong Kong from March 2027 with no sponsorship needed.
Participation in MTR Programmes (e.g. "'Train' for Life's Journeys" Programme, STEM Challenge, Youth Talk, etc.)
